

Materials matter.

# **MATERIAL SERVICE GUIDELINES FOR TEXTURE SCANNING AND PHYSICAL PROPERTIES MEASUREMENT**

VIZOO GmbH, March 2022

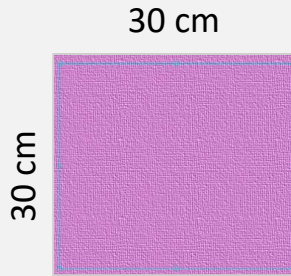

Please kindly do follow these guidelines  
to avoid any delay in processing

# STANDARD SWATCH SIZE

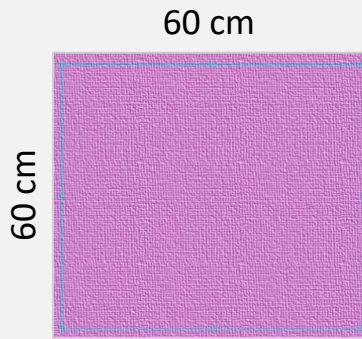

## Texture scanning only

Standard material swatch size is 20 x 20 cm  
(A4 scan)

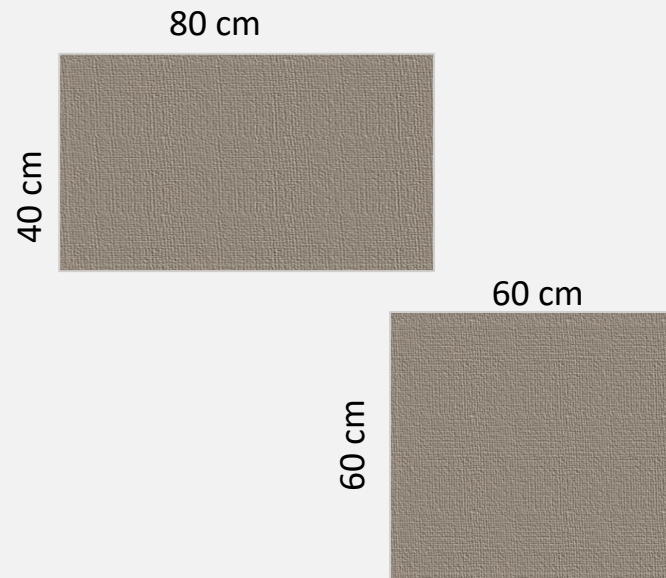

Standard material swatch size is 60 x 40 cm  
(A2 scan)

*NOTE: samples will not be cut in this process and can be returned to sender on request*

## Texture scanning + physical properties

Standard material size is 40 x 80 cm or,  
alternatively 60 x 60 cm  
*No additional scan swatch is required*

*NOTE: samples will be cut in this process and will not be returned!*

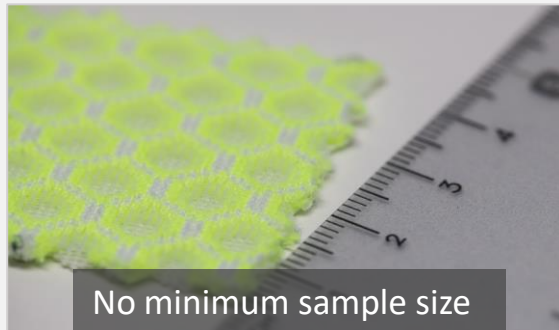

# MINIMUM SWATCH SIZE

## Texture scanning only

There is no minimum size. The sample should include at least one entire repeat pattern.

For organic materials do send minimum standard material size or bigger

No minimum sample size

## Texture scanning + physical properties

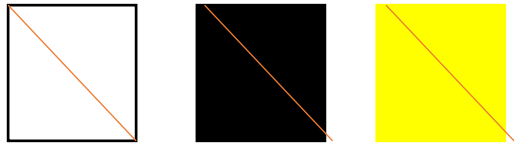

Please contact us if you cannot meet the standard texture size mentioned earlier.

# COLOR PREFERENCES

Generally, there is **no restriction to color**.  
We can create scans base on **any colored swatch**.

However, if your are able to provide the swatches in any color, a mid color is easiest to process.  
Thus try to avoid white, black or fluorescent surfaces.

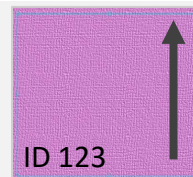

# SWATCH LABELLING

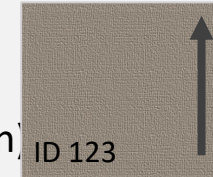

## Texture scanning only

- Label / ID
- Indicate front side
- Grainline (warp / weft)

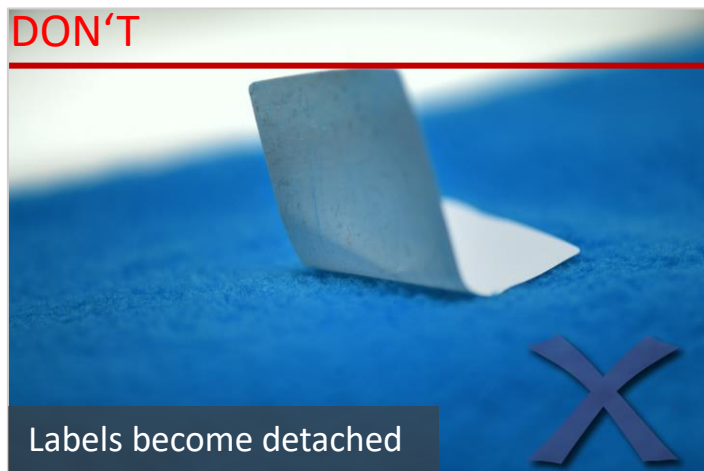

## Texture scanning & physical properties

- Label / ID
- Indicate front side
- Grainline (warp/weft direction)
- Fabric meta data (construction, composition, ...)

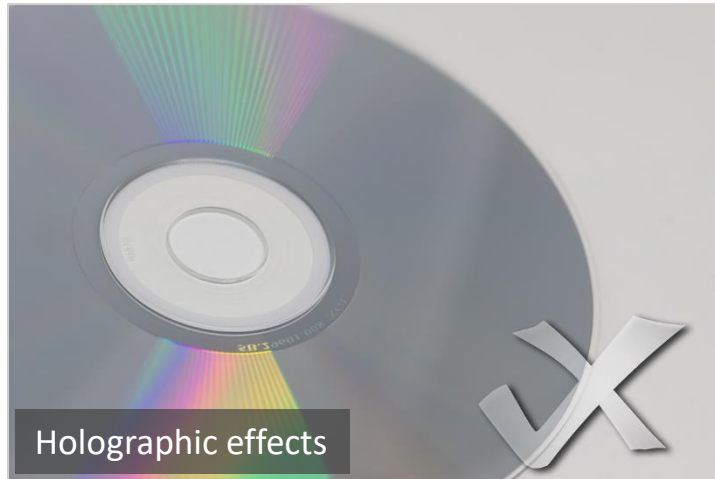

DON'T

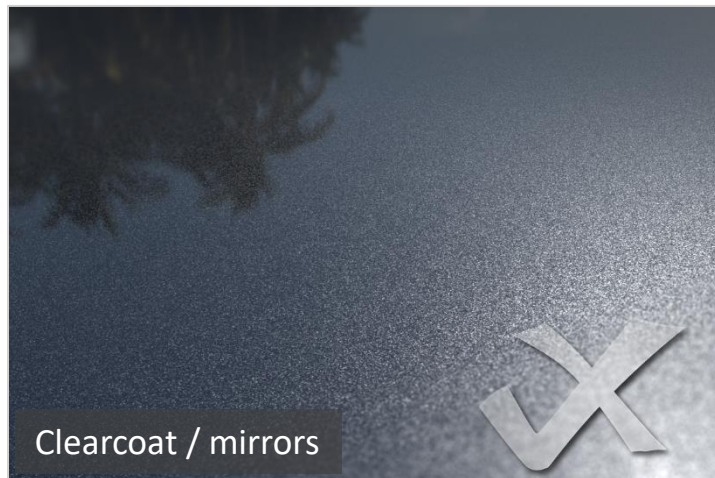

# LIMITATIONS

# VIZOO

Some material types are difficult to scan

- holographic
- Iridescence
- Cleacoat with flakes
- Furs

# READY TO GO? SWATCH PACKAGING & DELIVERY

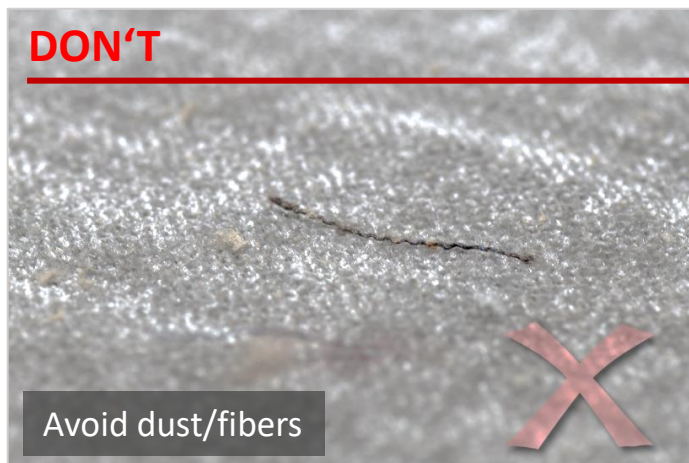

Please send the samples to:

*Vizoo GmbH  
Johann-Karg-Strasse 30  
85540 Haar  
Germany*

Do you have a Vizoo service ID [DT-xxx]? If yes, please state it on the outside of your package. Otherwise please mark clearly your company name on the package.

**DON'T**

# SCANNING SERVICE CHECK LIST

- ☐ Do my samples show one repeating pattern?
- ☐ Are my samples clean / not damaged?
- ☐ Are the materials labelled? (incl. indication of the front side, grainline)
- ☐ Did I communicate the preferred file format to Vizoo
- ☐ Did I communicate the preferred file naming to Vizoo
- ☐ For physics measurements: Do the samples meet the size requirements?
- ☐ For physics measurements: Is all required data provided? (category, construction, composition, warp & weft)
